

Mini Project 3: AI Career Advisor

Explanation

The AI Career Advisor helps users identify suitable career paths based on their skills, interests, and educational background. It provides personalized career recommendations and learning roadmaps.

Features

- Skills assessment
- Career recommendations
- Learning roadmap
- Goal tracking
- Progress monitoring
- Personalized suggestions
- Interactive dashboard
- Local storage support

AI Tools Used

- ChatGPT – Recommendation logic
- Google Gemini – Career research
- GitHub Copilot – Coding assistance
- Perplexity AI – Industry insights

Workflow

1. User enters skills and interests.
2. AI analyzes the data.
3. Career options are recommended.
4. Learning roadmap is generated.
5. Progress is monitored.

Benefits

- Career guidance
- Skill gap analysis
- Structured learning path
