

## **Mini Project 4: AI Productivity Dashboard**

### **Explanation**

The AI Productivity Dashboard helps users manage daily tasks, schedules, and productivity goals. It provides AI-based recommendations for prioritizing work and improving efficiency.

### **Features**

- Task management
- Schedule planner
- Productivity tracking
- Goal management
- AI recommendations
- Progress visualization
- Dashboard statistics
- Local storage support

### **AI Tools Used**

- ChatGPT – Dashboard logic and code
- GitHub Copilot – Development support
- Notion AI – Productivity planning
- Google Gemini – Feature enhancement

### **Workflow**

1. User adds tasks and deadlines.
2. Tasks are categorized by priority.
3. AI analyzes pending work.
4. Productivity recommendations are generated.
5. Progress is displayed through charts and statistics.

### **Benefits**

- Better time management
- Increased productivity
- Efficient task prioritization
