

Mini Project 6: AI Academic Planner

Explanation

The AI Academic Planner helps students manage study schedules, assignments, exams, and academic goals. It creates personalized study plans and tracks academic progress.

Features

- Study planner
- Assignment tracker
- Exam schedule management
- Academic goal setting
- Progress monitoring
- AI study recommendations
- Reminder system
- Dashboard analytics

AI Tools Used

- ChatGPT – Schedule generation and coding
- Google Gemini – Study planning strategies
- Notion AI – Academic organization
- GitHub Copilot – Development assistance

Workflow

1. User enters subjects and study hours.
2. Assignment deadlines are added.
3. AI creates a study schedule.
4. Progress is monitored.
5. Reminders and recommendations are provided.

Benefits

- Improved academic performance
- Effective time management
- Reduced exam stress
