

MINI PROJECT 7: AI Study Companion

Description:

The AI Study Companion is an intelligent learning assistant designed to support students in studying, revision, and concept understanding. It provides personalized study recommendations, generates summaries, creates quizzes, and answers academic questions using AI to improve learning efficiency.

Features

- AI-powered question answering
- Smart note summarization
- Quiz and practice test generation
- Personalized study recommendations
- Topic-wise revision support
- Progress tracking dashboard
- Study reminders and schedules
- Responsive user interface

AI Tools Used

- ChatGPT – Question answering and content generation
- GitHub Copilot – Coding assistance
- Google Gemini – Learning recommendations
- Quizlet AI – Quiz generation ideas

Workflow

1. User uploads study materials or enters topics.
2. AI analyzes the content.
3. Summaries and important points are generated.
4. AI creates quizzes and revision questions.
5. User practices and tracks learning progress.

Benefits

- Faster revision process
- Improved understanding of concepts
- Personalized learning experience
- Better exam preparation

7. AI Study Companion

Problem Statement: Build an AI-powered study support system for learning and revision.
