

MINI PROJECT 1: AI Personal Knowledge Management System

Description:

The AI Personal Knowledge Management System is designed to help users organize notes, documents, and learning resources in a centralized platform. It allows users to store, search, and manage information efficiently while receiving AI-based suggestions for related topics and learning materials.

Features

- Add, edit, and delete notes
- Search functionality
- Learning resource management
- AI topic recommendations
- Dashboard statistics
- Local storage support
- Responsive UI
- Category-based organization

AI Tools Used

- ChatGPT – Code generation and documentation
- GitHub Copilot – Coding assistance
- Google Gemini – Feature suggestions
- Notion AI – Knowledge organization

Workflow

1. User enters notes and resources.
2. Data is stored locally.
3. AI analyzes note content.
4. Related learning suggestions are generated.
5. User can search and manage stored information.

Benefits

- Better organization of information
- Quick access to learning materials
- Improved productivity
